3.2. モジュール関数.....	18

1. このリファレンスについて

本リファレンスは **Gura** の `opengl` モジュールおよび `glu` モジュールで定義されている関数の一覧を掲載しています。関数の詳細な動作は、**OpenGL** のドキュメントを参照ください。

OpenGL のオフィシャルサイトは <http://www.opengl.org/> です。

2. opengl モジュール

2.1. 命名規則

OpenGL の C 言語の関数はすべて `gl` で始まる名前がつけられており、`opengl` モジュールの関数も同じ名前を割り当てています。この関数名はベースの名前空間で他の要素と衝突する可能性が小さいため、以下のよう
にインポートして使用するとモジュール名をつける必要がなくなり便利です。

```
import (opengl) {*}
```

2.2. モジュール関数

```
glAccum(op:number, value:number):map:void
glAlphaFunc(func:number, ref:number):map:void
glAreTexturesResident(textures[:number])
glArrayElement(i:number):map:void
glBegin(mode:number):void {block?}
glBindTexture(target:number, texture:number):map:void
glBitmap(width:number, height:number, xorig:number, yorig:number, xmove:number,
         ymove:number, bitmap:binary):void
glBlendFunc(sfactor:number, dfactor:number):map:void
glCallList(list:number):map:void
glCallLists(type:number, lists[:number]):void
glClear(mask:number):map:void
glClearAccum(red:number, green:number, blue:number, alpha:number):map:void
glClearColor(red:number, green:number, blue:number, alpha:number):map:void
glClearDepth(depth:number):map:void
glClearIndex(c:number):map:void
glClearStencil(s:number):map:void
glClipPlane(plane:number, equation[:number]):map:void
glColor3b(red:number, green:number, blue:number):map:void
glColor3bv(v[:number]):map:void
```

Gura モジュールリファレンス – opengl

```
glColor3d(red:number, green:number, blue:number):map:void  
glColor3dv(v[:number]):map:void  
glColor3f(red:number, green:number, blue:number):map:void  
glColor3fv(v[:number]):map:void  
glColor3i(red:number, green:number, blue:number):map:void  
glColor3iv(v[:number]):map:void  
glColor3s(red:number, green:number, blue:number):map:void  
glColor3sv(v[:number]):map:void  
glColor3ub(red:number, green:number, blue:number):map:void  
glColor3ubv(v[:number]):map:void  
glColor3ui(red:number, green:number, blue:number):map:void  
glColor3uiv(v[:number]):map:void  
glColor3us(red:number, green:number, blue:number):map:void  
glColor3usv(v[:number]):map:void  
glColor4b(red:number, green:number, blue:number, alpha:number):map:void  
glColor4bv(v[:number]):map:void  
glColor4d(red:number, green:number, blue:number, alpha:number):map:void  
glColor4dv(v[:number]):map:void  
glColor4f(red:number, green:number, blue:number, alpha:number):map:void  
glColor4fv(v[:number]):map:void  
glColor4i(red:number, green:number, blue:number, alpha:number):map:void  
glColor4iv(v[:number]):map:void  
glColor4s(red:number, green:number, blue:number, alpha:number):map:void  
glColor4sv(v[:number]):map:void  
glColor4ub(red:number, green:number, blue:number, alpha:number):map:void  
glColor4ubv(v[:number]):map:void
```
